

Digital color specifications

Recognize each complete notation without rounding its source value.

Ocean / integer channels

RGB 18, 110, 120

Opaque sRGB channels on the 0-255 scale.

Mist / fractional channel and alpha

rgb(12.5 110 120 / 75%)

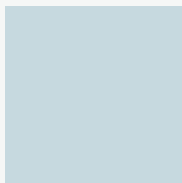

Keep the fractional first channel and 0.75 opacity.

Tide / percentage channels

rgb(10% 40% 50% / 50%)

Percentage components are not integer channel values.

Veil / legacy percentage notation

rgba(10%, 40%, 50%, 25%)

Comma-separated percentages retain 0.25 opacity.

Precision and text grouping

Preserve distinct native values; reconstruct only spatially adjacent items.

Deep A / precise sRGB

color(srgb 0.123456789012345 0.4 0.5 / 0.875)

Display swatch rounds to the same preview as Deep B.

Deep B / distinct precise sRGB

color(srgb 0.123456789012346 0.4 0.5 / 0.875)

Same rounded preview as Deep A; the source value is different.

Joined baseline / four separate text items

RGB 18, 110, 120

These four drawString calls share one baseline and small horizontal gaps.

Unrelated list / do not join these lines

RGB

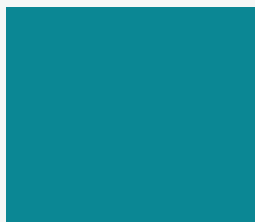

18	Page count
110	Inventory count
120	Reference index

The heading and unrelated numbers are separate lines, not a color expression.

Mixed spaces and a conflict

Retain unsupported print or wide-gamut evidence without inventing conversion.

Print Ocean / actual DeviceCMYK swatch

CMYK 85, 25, 35, 10

DeviceCMYK fill is intentionally present in the PDF.

No ICC-based conversion or RGB equivalence is supplied.

Spot reference / named print ink

PANTONE 7716 C

A named specification only; no RGB value or spot-ink paint is supplied.

Wide-gamut accent / printed specification

color(display-p3 0.1 0.8 0.3)

Do not relabel this expression as sRGB or infer a conversion from its name.

Ocean / conflicting digital specifications

Ocean

HEX #126E78

Ocean

RGB 19, 110, 120

Both values are printed under Ocean. Preserve both and flag the disagreement.

Invalid and ambiguous notation

None of these rows is a complete, in-range color value for automatic admission.

Integer out of range	rgb(256 110 120)
Negative channel	rgb(-1 110 120)
Percentage out of range	rgb(10% 101% 50%)
Alpha out of range	rgb(18 110 120 / 125%)
sRGB component out of range	color(srgb 1.1 0.4 0.5)
Missing component	rgb(18, 110)
Mixed separator grammar	rgb(18, 110 120)
No declared component units	RGB 0.1 / 0.4 / 0.5
No closing parenthesis	color(srgb 0.1 0.4 0.5
Unlabeled numbers	18, 110, 120

Retain the source text and describe uncertainty. Do not clamp, repair, or guess.

Unselected page sentinel

Tests selecting pages 1-4 must not read or import anything from this page.

UNSELECTED_NUMERIC_SENTINEL

HEX #AD1234

rgb(173 18 52 / 37%)

This page exists only to test the selected-page boundary.
